

Landscapes in Oils

With
Brett Weaver

July 17 to July 19, 9am-4pm, Open to All Levels, \$330

We will focus on the fundamentals of building a solid foundation for your landscape paintings, including simplicity of design and composition and the importance of variety and color relationships, as well as being bold and direct. Students will learn to work in a simple split primary palette of specified colors (warm and cool of each primary) to aid in color harmony and development of color mixing skills. Brett provides daily demonstrations, as well as individual help and critiques while students paint. Painting and instruction will be on location around Door County.
